DETAILED ACTION

Inventorship

Petition for correction of inventorship to add Paulo Back to the list of inventors is acknowledged.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Annie Wang on August 6, 2009.
3. The application has been amended as follows:
 - Claim 1, line 4:** receiving, by the computer system, the transaction;
 - Claim 1, line 9:** wherein the configurable template includes one or more drivers embedded in a computer readable medium of the computer system,
 - Claim 21, line 6:** receiving, by the computer system, the transaction;
 - Claim 21, line 11:** wherein the configurable template includes one or more drivers embedded in the computer readable medium,

Allowable subject matter

4. Claims 1, 5-21, and 25-40 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:
6. The closest prior art of record are Maritzen et al (US Pat No. 5,987,429) in view of Bross et al. (US Publication No. 2003/0105687 A1).

Maritzen discloses a method and apparatus for automatically tracking, calculating and electronically paying taxes, royalties and other fees associated with transactions in electronic commerce systems. Fees due from transactions in electronic commerce are processed by building a transaction information database with transaction event objects based on events in each transaction. After retrieving fee rules from a fee rule database, a determining step detects if the fee rule applies to information in a transaction event object. Then, if the fee rule applies, a calculating step calculates the fee based on the fee rule and the information in the transaction event object. A fee object for a recipient entity is created based on the fee calculated by said calculating step and is stored in a payment database. An accumulating step sums the payments for a recipient entity from the fee objects in the payment database. The fee rules are general fee rules and specific fee rules. The general fee rules are applied to information in a transaction event object, and a calculating step calculates a general fee based on the general fee rule and the information in the transaction event object. Thereafter, the specific fee rules are applied to information in a transaction event object, and the calculating step calculates a specific fee based on the specific fee rule and the

information in the transaction event object.

Bross discloses a computer-based method performed in a first transaction-tax-related application. The method comprises exchanging transaction-related data with at least a second transaction-tax-related application according to a standardized transaction-tax interface data model. The invention is also directed to another computer-based method and a related data record, a related software interface, a related computer-based data warehouse module and a related software application.

The prior art of record does not disclose or suggest a method wherein the configurable template identifies one or more condition groups, wherein a condition group is a combination of values and conditions associated with the drivers in the configurable template, and wherein the condition group specifies one or more conditions that must be satisfied for the tax computation process to arrive at a result; determining whether each condition in a first condition group is satisfied by comparing the value of the set of attributes associated with the transaction to the value stored with the condition in the driver template; and responsive to none of the one or more condition groups identified by the configurable template is satisfied, applying a second tax rule, which specifies a second configurable template for a second tax computation process, in order of precedence in the process of determining the tax for the transaction. The limitation mentioned above along with the other claimed limitations of independent claims 1 and 21 are novel and unobvious and are deemed allowable over the prior art of record. Dependent claims of 1 and 21 are allowable by dependency.

Any comments considered necessary by applicant must be submitted no later

Art Unit: 3627

than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
